WORK EXPERIENCE

Fullstack developer

Feb. 2021 – till date

Devlights

- Developed Node.js backend applications with Express and JWT authentication.
- Designed and documented many API REST.
- Modeled MongoDB and PostgreSQL databases.
- Built frontend applications in React + Next.js + Redux, with UI libraries like Reactstrap and Chakra UI.
- Developed marketing landing pages with HTML, Sass, GSAP and jQuery.
- Made lots of CSS and JavaScript animations and effects. Also did funny things with SVG.
- Performance and SEO optimization.
- Accessibility testing.

Scholar researcher

Feb. 2021 – till date

CINAPTIC – UTN

I contributed in the research and development of two research projects at my university, "Evaluation of human emotions in software quality perceived by the user" and "I-QuAGI, a smart agent for evaluating quality in agile software processes".

Skinland

2015 – 2020

Web developer

- I developed and managed the ecommerce site and helped this small business duplicate sales in two years. I built it with Wordpress, WooCommerce and a customized template with CSS.
- I implemented analytics which helped gathering information related with customer preferences and conversion rates.

EDUCATION

Systems Engineering

2016 – 2022 (Estimated)

National Technological University

Leading Digital Transformation

May – June 2020

Online Program

Massachusetts Institute of Technology

- Introduction to Blockchain, AI, Cloud and cybersecurity.
