SKILLS

FRONTEND

- React
- Next.js
- Redux
- Vue

BACKEND

- Node.js
- Express
- Django
- MongoDB
- MySQL
- Firebase

OTHER

- Web accessibility
- Agile
- JIRA
- Figma
- Notion
- Adobe Illustrator

LANGUAGES

- Spanish (native)
- English

WORK EXPERIENCE

Globant
June 2021 - till date

Web UI Developer

- Developing a financial well-being web app with Vue.js and TypeScript
- Creating reusable, responsive components and building a design system with Storybook
- Performed animations across the UI and styling with Tailwind CSS
- Wrote unit tests with Jest
- I completed a React Native bootcamp, where I developed a simple app connected to a public API.

Fullstack developer
Feb 2021 - June 2021

Devlights

- Developed Node.js backend applications with Express and JWT authentication, following micro-services architectures.
- Designed, documented and built many API REST.
- Modeled MongoDB and PostgreSQL databases.
- Built frontend applications in React + Next.js + Redux, with UI libraries like Reactstrap and Chakra UI.
- Developed marketing landing pages with HTML, Sass, GSAP and jQuery.
- Made lots of CSS and JavaScript animations and effects. Also did funny things with SVG.
- Performance and SEO optimization.
- Accessibility testing.

Scholar researcher
Feb 2021 - Nov 2021

CINAPTIC - UTN

I contributed to the research and development of two research projects at my university, "Evaluation of human emotions in software quality perceived by the user" and "I-QuAGI, a smart agent for evaluating quality in agile software processes". The team published several papers that were presented in important engineering congresses, with me as a speaker.

EDUCATION

Information Systems Engineering
2016 - 2023 (Estimated)

National Technological University
